|------------------------|-------------|----------------------|-------------------|

The UT347H Commercial Ultra High Definition (UHD) TV Series is a cost-effective, reliable 4K UHD TV that has been designed to operate with an LG Commercial set top box to provide Pro:Centric Smart features. Designed exclusively for hotels, the UT347H Series delivers beautiful images anchored by a stylish, versatile commercial grade stand. In addition, this Series can be combined with an LG set top box to enable a Pro:Centric Direct experience equivalent to top-tier hospitality TVs.

UT347H SERIES

HOSPITALITY FEATURES

What is NanoCell TV?

LG NanoCell displays incorporate nano-sized material with LG's IPS panel technology. The nano-sized material is combined with a polarizer to produce a wide color gamut and express vivid, accurate colors, while maintaining LG's industry-leading 178° IPS viewing angles.

Nano Color (Ultra Vivid)

NanoCell technology uses nano (approximately 1 nm) particles to absorb certain wavelengths, enhancing the purity of the color of the screen while expanding the overall color gamut. Other small-particle technologies use materials comprised of 3x to 6x larger particles, which do not approach the advanced composition of our NanoCell material.

Nano Bezel (Cinema Screen)

LG NanoCell TVs have significantly reduced the bezel thickness of the top, left and right sides. With bezel measurements of 5mm (or less) occupying less than one percent of the total viewing area, NanoCell TVs create much more immersive viewing experiences compared to typical TVs of the same screen size.

Nano Thickness (Slim Design)

LG NanoCell TVs are significantly more sleek, due to a reduction in overall thickness, which creates a much more sophisticated appearance. This slim, modern design is yet another benefit of LG IPS panels with NanoCell technology.

UT347H SERIES

HOSPITALITY FEATURES

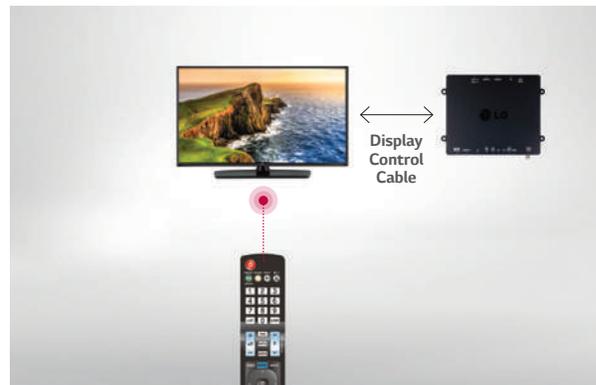

External Speaker Out

Enhance the entertainment experience with an additional speaker (sold separately). Guests can listen to the TV audio from other rooms within their suite, not only the room where the TV is located.

IR Pass Through and Control

The UT347H supports both RS-232/TLM and the new MPI-based External Control Interface (ECI) for external set top box control of the TV and IR Pass Through. This feature provides an integrated two-piece solution using one guest remote control.

* A system is comprised of one LG Commercial Lite display and one LG Commercial set top box.

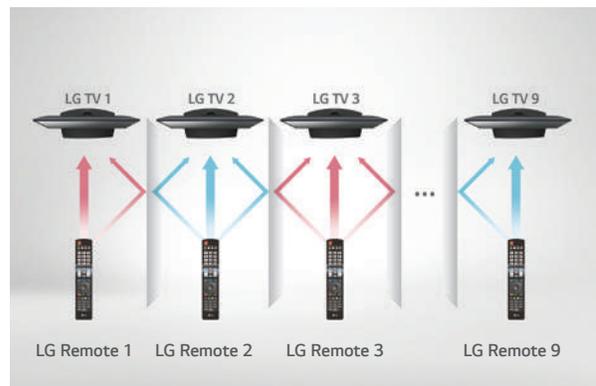

Public Display Mode

From channel selection to volume level, you can control the TV settings in your hotel's common areas. Public Display Mode also enables restoration of your hotel's default settings on the TVs when required.

Multi-code IR

Multi-code IR* function eliminates any remote control signal interference between TVs in rooms with multiple TVs installed.

* Requires optional multi-code IR remote.

UT347H SERIES

HOSPITALITY FEATURES

USB Data Cloning

For fast and easy configuration of multiple TVs, create a Master TV Setup on one TV and then export the setup "clone" file to a USB memory device. Use the USB device to easily import the setup to other TVs of the same model.

Lock Mode

Lock Mode blocks external input signals with non-compliant content. This useful feature prevents the misuse of TVs in public spaces.

Self Diagnostics via USB

The UT347H TV Series stores 24-hour diagnostic data, which can be saved to a USB memory device, enabling service engineers to identify technical issues quickly and easily.

Ultra HD (4K) Resolution

UHD delivers a resolution four times higher than that of Full HD, creating a more realistic and immersive television viewing experience. The stunning 8.3 million pixels create flawless images with incredibly vivid detail.
